CAREER SUMMARY

AI/ML and Data Science Engineer with hands-on experience in machine learning, deep learning, and data analysis. Developed Data science and AI solutions in cybersecurity, computer vision and healthcare. Skilled in Python, Data Science libraries, SQL, AI models training and performance evaluation. Interested in learning emerging technologies, developing scalable data-driven solutions for real-world problems.

SKILLS

- **Programming Languages** - Python, SQL, Bash
 - **Data Analysis & Visualization** - Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Power BI (DAX, Data Modeling, Interactive Dashboards, KPI Reporting)
 - **Machine Learning & Artificial Intelligence** - Scikit-learn, TensorFlow, Keras, Deep Learning (ANN, CNN, LSTM), Model Training, Feature Engineering, Performance Analysis, ML pipelines, NLP, Computer Vision, Prompt Engineering and CUDA Fundamentals
 - **Databases** - MySQL, SQL Server, Database Management Systems (DBMS)
 - **Tools & Technologies** - Git, GitHub, Jupyter Notebook, Flask, Linux
-

EDUCATION

- **Bachelor of Technology** - CSE (Artificial Intelligence and Machine Learning) | ACE Engineering College | 2021- 2025 | GPA: 7.83
 - **Intermediate** - Mathematics, Physics and Chemistry | Sri Chaitanya Junior College | 2019 - 2021. GPA: 9.66
 - **10th Standard** - SSC | Joshis Vidyaniketan School | 2018 - 2019. | GPA: 9.8
-

EXPERIENCE

Data Science Intern | Infoz IT Solutions | Mar 2026 - May 2026 | Hyderabad, Telangana

- Developed and Tested Data Science solutions using Python, data science libraries (Numpy, Pandas, Seaborn, Matplotlib), ML algorithms and techniques.
 - Analysed datasets and performed data cleaning, visualization, EDA to extract meaningful insights.
 - Implemented machine learning and deep learning models for data classification, regression and performance evaluation.
 - Gained exposure to industry standard data, Data Science and AI workflows, project lifecycles
-

PROJECTS

Hybrid Machine Learning Model for Efficient Botnet Detection

Technologies: Python, Deep Learning, CNN, RNN, LSTM, ANN

- Developed a **stacked deep learning model using CNN, RNN, LSTM, and ANN layers** to detect botnet attacks in IoT environments.
- Performed **data preprocessing, feature engineering, and model training** to capture complex botnet behavior patterns with 98% detection accuracy.
- Built a Flask-based web application with MySQL backend for real-time attack prediction enabling security monitoring and scalable model interface.

Crowd Management Using Existing CCTV Network

Technologies: Python, YOLOv8, Deep Learning

- Built a **YOLOv8-based model** for real time people detection and counting from CCTV.
- Implemented **real-time crowd monitoring** to track the number of individuals in public environments.
- Integrated solution with existing CCTV infrastructure, automating it and reducing manual effort.

Neurofibroma Detection and Classification

Technologies: Python, CNN, Deep Learning

- Developed a **CNN-based model** to detect and classify brain tumors using MRI scan datasets
- Performed **data collection, preprocessing, model training, and testing** on medical imaging data to analyze and predict Neurofibroma (Brain Tumors)..
- Demonstrated the potential of **AI-based healthcare solution**

CERTIFICATIONS

- **IIT GUWAHATI** - Data Science with Artificial Intelligence, Generative AI & Prompt Engineering, E&ICT Academy, IIT Guwahati
- **CISCO Networking Academy Certifications** - CLA, PCAP
- **Industry Exposure Program** - Infoz IT
- **Cambridge University** – Business English Certificate
